softclick Extensions by gobella

Voluminous long hair in a few minutes and without any help? Flexible styling for everyday life, a girls night out or the date with Mr. Right? Be your own hairdresser and rediscover yourself - with the coolest solution since extensions exist.

- ✓ Bombproof hold
- ✓ Protects the natural hair
- ✓ Flexible styling everyday
- ✓ Quick and easy attachment
- ✓ Remy human hair in premium quality
- ✓ Volume up to the hair tips

Our magnetic closure is gentle on your hair and can be attached in no time. Convince yourself! We say thank you for choosing us and wish you lots of fun with your new look.

Attaching the Extensions

- The hair must be attached without pulling in the direction of growth
 - Separate a thin section of hair - as wide as half of the Softclick closure.
 - Open the Softclick closure, slide half of the opened softclick under the separated hair section and fold the other half over, so that the own hair lies in between in the sandwich.
 - Slide the closure to the hair roots, holding the strand of natural hair in place.
- 
- 
- 

Positioning the Extensions

- Start in the middle of the neck - keep enough distance to the hairline.
- Do not start too far down - this way the hair can be pinned up better.
- Divide next higher row and keep distance to the side contour.
- Don't place the extensions accurately on top of each other. Offset diagonally in a checkerboard pattern.
- The distance to the ear and the side contours of the hair is important for comfort and inconspicuous results, especially with thin hair.

Care Tips

To enjoy your extensions for a long time and to guarantee a perfect look, you should stick to the following care tips. .

Washing the Extensions

Attention!!! The magnetic closure shouldn't get wet. Keep water and care products away from the closure.

- Add a shot of shampoo to 1 liter of warm water (e.g. gobella Premium shampoo).
- Hold the magnet in your hands, place the hair in the water bath and swivel it, do not rub!
- Rinse with clear water.
- Carefully apply a hair mask to the extensions and keep the magnetic closure dry. (e.g. gobella Mask)
- Let it take effect for 3-5 Min.
- Rinse the extensions with water and dab with the towel, do not rub.
- Alternatively, the extensions can be air-dried or blow-dried carefully and not too hot.

When using silver shampoo, first try the effect on a small strand and dilute 1 to 3 if necessary.

Styling, Coloring & Straightening

When applying styling products, you should be careful not to apply anything to the magnetic closure. Let your hair air dry afterwards or blow dry it carefully and at low heat level. We recommend using the gobella heat protector before blow-drying to protect your hair from drying out.

Softclick Extensions should be sprayed with the gobella heat protection before using a straightening iron or curling iron. Do not use a curling iron or straightening iron at temperatures higher than 160°C.

The extensions have already been treated with color. We therefore advise against further dyeing, as it can damage the hair. If you still want to change color, pay attention to keep distance from the closure.

Brushing the Extensions

Brush the hair regularly. Go through your hair several times with an extension brush. Start at the tips and work your way up. Do not brush your hair when wet and take it out before going to sleep.

Taking a Bath

The magnetic closure should be kept dry. Remove the Softclick Extensions before you jump into the water or take a shower. Sun creams can discolor blonde hair, so avoid contact if you are wearing light colored extensions. You have further questions about the use or care of the extensions?
